DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 14-53 is the inclusion of the limitations of:

Claims 14 and 43:

A drop generator comprising an outlet channel connected to the pressure chamber; the outlet channel including a first circular outlet channel section connected to the pressure chamber, a first non-circular outlet channel section connected to the first circular outlet channel section, a second circular outlet channel section connected to the first non-circular outlet channel section, and a second non-circular outlet channel section connected to the second circular outlet section.

Claims 50 and 53:

A drop generator comprising the outlet channel including a circular outlet channel section and a non-circular outlet channel section having an oval cross-section.

It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Chung et al. (European Pat. No. 1 321 294 A2) teaches an outlet channel including a first circular outlet channel section (230, Fig. 5) connected to the pressure chamber (120, Fig. 5), a non circular outlet channel section (311, Fig. 5) connected to the first circular outlet channel section, and a second circular outlet channel section (312, Fig. 5) connected to the first non-circular outlet channel section (Fig. 5).
